

EU Nationals and 2018-2019 Student Funding in Scotland

Scottish Government has announced that EU students who are studying a course of Higher Education at college or university in Scotland in 2018-2019 have been granted free tuition for the duration of their course. This means that eligible EU students will continue to have access to free tuition, including tuition fee support from the Student Awards Agency Scotland (SAAS). SAAS will assess applications against existing eligibility criteria, and will provide funding in the normal way.

This confirms that the guarantee already in place for eligible EU students enrolling this year will be extended to those beginning their studies the following academic year.
